PRIVATE SECTOR HIRING

# Axiom Wealth Opens Three Kolkata Roles as Demand Spans Finance Operations, AI and Digital Media

Published: 29 September 2026 | Edited by: Arghya Sarkar

Kolkata, September 29, 2026: A new set of vacancies in Kolkata reflects the range of skills employers are seeking in West Bengal. Axiom Wealth Pvt Ltd is recruiting for three roles that span mutual fund operations, artificial intelligence and digital media.

The Mutual Fund Business Operator will handle investor transactions through NSE Invest and maintain records in Pocket Mutual Fund. The advertised salary is Rs. 17,000-Rs. 20,000 per month. The Senior Technology Officer, offered approximately Rs. 4 lakh annually, will develop AI agents, automation and software tools for business operations. A Digital Media Manager will create video, design and social media content, with a strong portfolio carrying weight in the selection process.

The roles are based at Axiom Wealth's Netaji Subhas Road office. They show how even a single financial services business may recruit across several disciplines at once: people who can keep transactions accurate, build useful technology and explain ideas to a digital audience.

For job seekers in West Bengal, the openings are a reminder that opportunities are emerging at the intersection of established industry knowledge and newer technical or creative skills. They are one example of current hiring activity, rather than a measure of the state's overall employment trend.
