Fresh Steel-Sector Vacancies Offer Encouraging Signs for West Bengal's Job Market in 2026

Kolkata, 14 October 2026: Fresh recruitment opportunities involving Durgapur Steels Ltd and PRAVAAH GLOBAL LLP offer an encouraging signal for West Bengal's job market, with openings spanning manufacturing, sales, finance and office support.

The hiring mandate lists five roles-Senior Accountant, Project Sales Executive, Front Office Executive, Office Boy and Production Manager-across Kolkata and Durgapur. The range of positions highlights opportunities for candidates with different qualifications, from Madhyamik pass applicants to commerce graduates and engineering professionals.

Durgapur, one of West Bengal's established industrial centres, is the location for the Production Manager vacancy. Applicants require a B.Tech or Diploma qualification and at least three years of relevant experience with a steel manufacturing company.

The Project Sales Executive opening seeks graduates with three or more years of project sales experience at a leading steel company, highlighting the need for commercial expertise alongside production skills.

In Kolkata, the Senior Accountant position offers Rs. 20,000-Rs. 30,000 per month, while the Front Office Executive and Office Boy roles offer Rs. 15,000 and Rs. 10,000 per month, respectively. Compensation for the production and project sales positions will depend on candidate suitability.

Although a single recruitment mandate cannot establish a statewide employment trend, these openings provide a positive local signal of hiring activity in 2026. They also demonstrate how steel-related businesses create opportunities across both industrial operations and supporting office functions.
